

Latest Pavilion News

May 5, 2010

Dear Volunteers,

Thank you all for your patience with the first phase of the Pavilion Project. Even though no physical signs of construction are happening, progress is being made behind the scenes, with one of them being a "God surprise".

1. The ***God Surprise***: A Brother In Christ has donated his time and equipment to prepare the foundation for the pavilion and committed to leveling about six acres on the West end of our First Friends property for future athletic events. Because of this donation, we are taking more time for planning and surveying.
2. Research is being done to seed the extra six acres being leveled.
3. The trusses have been ordered.
4. The structural and electrical engineering have been completed.
5. Final architectural drawings are being completed.
6. Soil testing will be done this week, to determine the strength of the soil.
7. Final approvals of the drawing are being completed, and we will hastily get the building permits when finished.

Thank you, again, for your patience. We will be in touch with you in the very near future. Remember to keep checking the website for updates.

Blessings,

Pavilion Committee
